

PRESENT AND PAST PROFESSIONAL EXPERIENCE

Caribbean Vibes, Inc. T/A Club Timehri, Adams Morgan, Washington, D.C.

President & CEO

Club Timehri is a Tavern which offers Caribbean music to the diverse Adams Morgan and greater Washington area crowd. Club Timehri was purchased by Caribbean Vibes in 2006.

SEBACO Machinery, Landover, Maryland

Founder & CEO

Founded in 2004, SEBACO Machinery specializes in providing used Caterpillar equipment and parts to customers involved in mining, manufacturing and farming in Central America, the Caribbean and South America.

Verizon Business, Enterprise Business Solutions, Silver Spring, Maryland

Technical Manager

Provide high-availability network connectivity solutions to commercial and federal clients connecting from Microsoft Application servers to back-end Oracle databases running on SUN Solaris servers. Design and configured secure trusted UNIX servers and Microsoft domains to provide application services and database connectivity to clients in both test and production environments. Provide solutions to application developers for both commercial and locally run applications within the federal network of customers. Supervise five technical professionals in the deployment and development of UNIX servers in a mission critical high availability environment.

Bell Atlantic Federal System, Inc., Silver Spring, MD
Senior System Administrator, Software Engineer

As a Senior System Administrator I supported a computer infrastructure consisting of 332 computers and 805 users. Infrastructure consisted of UNIX servers and workstations, NT servers, workstations, desktops and communication equipment. Tasks included, investigating new software solutions and determining and implementing infrastructure requirements. Engaged in contingency and capacity planning to maintain high levels of availability. Involved in every aspect of the System Development Life Cycle from initial design to implementation. As a Software Engineer I implemented guidelines to ensure high levels of availability for UNIX based applications. Served as the primary point of contact for hardware vendors, application support groups, and database administrators within the federal network of clients.
